

THEJAZ RAMESHAN

Full Stack Engineer | Mobile & Platform Engineering | Bangalore, India | +91 9496013231 | thejazrameshan@outlook.com

PROFESSIONAL SUMMARY

Full Stack Engineer with **7+ years** of experience delivering scalable, high-performance applications across **iOS, Android, Web, Kiosk, and TV platforms**. Deep expertise in **React Native architecture & upgrades, CI/CD (Bitrise)**, and **production observability (Sentry, Datadog)**. Proven track record of driving **measurable business outcomes** through performance optimization, analytics-led decisions, and resilient system design for large, real-world user bases (parent/staff/guardian ecosystems).

CORE IMPACT

- 🚀 Reduced app load times by **40%+**, improving retention and session depth
 - 📱 Decreased crash rate by **30–50%** via Sentry instrumentation and RN upgrades
 - ⚙️ Cut build & release time by **50%** using Bitrise CI/CD pipelines
 - 📊 Enabled real-time observability with Datadog, reducing MTTR by **25%+**
 - ♻️ Increased development velocity by **30%+** via modular architecture & reusable components
-

TECHNICAL SKILLS

Frontend: React Native, React.js, JavaScript (ES6+), HTML5, CSS3

Backend: Node.js, GraphQL, Apollo Client

State Management: Redux

Databases: MySQL

DevOps & Observability: Bitrise, Sentry, Datadog, Firebase

Experimentation: Split.io (Feature Flags, A/B Testing)

Core Expertise: React Native Upgrades, Performance Optimization, Release Engineering, System Design

Platforms: iOS, Android, Web, Apple TV, Kiosk

PROFESSIONAL EXPERIENCE

Senior Software Engineer | Ceegees Software Solutions Pvt Ltd

2019 – Present

Architecture & Platform Engineering - Architected scalable cross-platform applications powering **parent, staff, and guardian ecosystems** across mobile, kiosk, and TV platforms - Led **multiple React Native upgrades (major versions)**, eliminating legacy debt, improving stability, and ensuring long-

term maintainability - Designed **modular, reusable component systems**, reducing duplicate code and accelerating feature delivery by **30%+**

Performance & Reliability - Reduced app load times by **40%+** via code-splitting, memoization, and optimized rendering strategies - Implemented **Sentry-based crash monitoring**, reducing crash rates significantly and improving production stability - Integrated **Datadog RUM & logging**, enabling real-time performance tracking and faster root cause analysis

CI/CD & Release Engineering - Built and maintained **Bitrise CI/CD pipelines** for automated builds, testing, and deployments - Reduced release cycle time by **50%**, enabling faster feature rollouts and hotfixes - Implemented **environment-based configurations & feature flags** using Split.io to safely roll out features

Product & Feature Delivery - Delivered multiple production-grade apps across **NTUC ecosystem (staff, parent, guardian, kiosk, Apple TV)** - Designed and implemented **QR-based attendance systems**, replacing manual workflows and improving efficiency by **50%+** - Integrated **third-party APIs, native modules**, and analytics systems across iOS and Android

Collaboration & Leadership - Actively contributed to **Agile ceremonies**, sprint planning, and code reviews - Mentored junior developers and enforced best practices in code quality and architecture

KEY PROJECTS

NTUC Kiosk & TV Applications

Technologies: React Native, Apple TV, QR Systems, Datadog

- Built real-time **QR-based attendance system** for high-throughput environments
 - Improved operational efficiency by **50%+**, eliminating manual tracking
 - Engineered apps to handle **concurrent user interactions reliably** in kiosk environments
 - Delivered seamless performance across **Apple TV and kiosk devices**
-

NTUC Staff, Parent & Guardian Apps

Technologies: React Native, Firebase, Sentry, Datadog

- Developed large-scale applications supporting **multi-role user ecosystems (staff, parents, guardians)**
 - Integrated **Sentry for crash analytics** and **Datadog for performance monitoring**
 - Reduced crash rates and improved stability through proactive monitoring and fixes
 - Implemented **real-time notifications & syncing**, improving communication efficiency by **35%**
-

ShopG – E-commerce Platform

Technologies: React.js, Node.js, WordPress

- Built scalable hybrid e-commerce platform with **React + Node.js architecture**
 - Integrated **WordPress CMS**, reducing content update time by **60%**
 - Improved page load performance, increasing engagement and conversion potential
-

Kazhutha – Facebook Instant Game

Technologies: React.js, Redux

- Developed interactive game with optimized rendering and **Redux state management**
 - Improved gameplay smoothness and reduced latency
 - Increased user session duration through performance optimizations
-

EDUCATION

Bachelor of Technology in Computer Science

Kannur University | 2014 – 2018

ADVANCED STRENGTHS

- Cross-platform architecture (Mobile, Web, TV, Kiosk)
- Observability-driven development (Sentry, Datadog)
- CI/CD & release engineering (Bitrise)
- React Native lifecycle management & upgrades
- Performance tuning & debugging at scale
- Scalable system design & modular architecture
